

## Artificial turf attachment ATA1200

The artificial turf attachment ATA1200 is made for professionals. It cleans, filters & returns the infill in a single pass. The fully hydraulic system powered with Avant performs the cleaning tasks efficiently, economically and with very low impact footprint in all artificial surfaces.

The regular cleaning and maintaining of the artificial surfaces reduces compaction and sustains the optimum surface conditions and playing dynamics year-around. Well maintained sport surfaces also reduce the risk of acute and chronic injuries.

- ✓ **Rotating main brush**
- ✓ **Turbine powered dust and fine particle extraction system including 2 collection hoppers**
- ✓ **Adjustable and interchangeable sieving chamber with 2 large rear hoppers to collect larger debris**
- ✓ **Rubber/cork infill sieve as standard, other sieves available as an option**
- ✓ **Refill unit operating at 1.5x the ground speed to put back the cleaned rubber and soil**
- ✓ **Foldable following brush at the back of the unit to level the infill and finish the cleaning**

Option:

Rear brush at the back of the unit to level the infill and finish the cleaning, A37035

Front rake for deep cleaning of the field, A37061

Sand sieve, A421389

Deep cleaning sieve, A421391

Tilt adapter 90 degrees, to be able to access through smaller gates and corridors (requires optional second auxiliary hydraulics outlet in the front) A36505

Working width	1200 mm
Weight	360 kg
Product no, without rear brush	A36494
Product no, with rear brush	A37230

includes rubber/cork infill sieve, without front rake
