

Makes it possible to have compressed air anywhere you go. Creates max. 400 l/min air flow @ 8 bar pressure. Can be used for running power tools and, for example, filling of large tyres in places where electric current is not available, and for cleaning of big machines like combined harvesters etc.

- Easy way to get compressed air e.g. for pneumatic power tools
- Makes it possible to fill large tyres (agricultural & construction machines for example) in places where electric current is not available
- Fast cleaning of big machines with compressed air: combined harvester, construction machinery etc.
