

Concrete mixing bucket

Concrete mixing bucket is a handy tool when you need to make concrete without electricity or when you need to transport or lift the concrete to a place hard to access. The bucket is equipped with a screw shaft and a guard grill on the bucket. Available in two sizes: a 210 l capacity bucket (two versions: emptying from the bottom hatch in the middle of the bucket, or on the left of the bucket), and a larger 320 l concrete mixing bucket, intended for 700 and 800 series, is now available. It is equipped with emptying in the middle of the bucket. Hatch opening is powered by a hydraulic cylinder controlled with an electric directional valve, operation from driver's seat with an electric switch. The bucket is also equipped with a flexible 1350 mm emptying tube which mounts on the bottom hatch. This enables pouring of the concrete further away from the bucket.

- ✔ **Easy and efficient way to make concrete in places where electricity is not available**
- ✔ **The mixed concrete is easy and effortless to transport and pour into desired place**
- ✔ **Self loading – sand can be taken to the bucket directly from the pile**
- ✔ **Concrete can be poured to over 2 m height**

Model	200	350
Total width	1490 mm	1700 mm
Screw shaft diameter	400 mm	480 mm
