

# Ripper

Electric Machine Compatible

The ripper is an inexpensive and practically irreplaceable tool in ground works. With the ripper it is easy and effortless to remove roots as well as rocks even from hard packed ground. The replaceable hard metal teeth guarantee a long lifespan for the attachment.

The ripper is operated by pressing the three blades into the ground next to the object you wish to remove. When the teeth have sunk into the ground, tilt the ripper inwards and then lift the boom upwards which will bring the object on top of the ground.

- ✔ **An inexpensive tool for removing of rocks, tree stumps, roots etc. from the ground**
- ✔ **Eliminates a huge amount of manual work**
