

Roller compactor

Electric Machine Compatible

The roller compactor with mesh roller is a practical attachment for compacting soil when preparing for lawn seeding and right after lawn seeding. You are able to compact soil with the full 1500 mm width of the roller and push down with the whole weight of the loader's front axle.

The other roller compactor model is equipped with a plain, hollow roller which can be filled with water (max. 167 l). It is useful for preparing and compacting a newly installed sod and similar surfaces where a plain roller is a must and mesh rollers cannot be used. Both compactors can also be fitted with max. 4 pcs of Avant 29 kg back weights. The compactors can also be towed, if needed, with the A37481 drawbar mounted on the compactor.

- ✓ **Easy and economical compacting of lawns before and after seeding with the mesh roller**
- ✓ **Plain roller is useful for compacting a newly installed sod and similar surfaces; can be filled with water**
- ✓ **Both models can also be towed with the A37481 drawbar**
- ✓ **4 pcs Avant 29 kg back weights can be mounted to add weight**
