

Screening bucket

The Avant screening bucket is a fast and efficient compact system for screening and blending soils, aggregates and compost. The durable and flexible star-shaped plastic Poly Star rollers screen without shredding the vegetation or crushing the aggregates into the finished screened product.

The unique design fitted with sealed bearings, self tensioning carbon belt driveline and flexible Poly Stars enables for a large screening area to create a low maintenance, fast and efficient screening system.

- ✔ Separates stone/soil/vegetation
- ✔ Screens without crushing or shredding
- ✔ Suitable for different types of soil

Width	1410 mm
Bucket volume	258 l
Screening area	1200 x 430 mm
Weight	390 kg
Product no	A36503
