

Silage block cutter

Powerful and robust silage cutters with two hydraulic cylinders. With the silage cutter you can easily cut silage directly from the silo and take it to the cattle. Cutting blades are made of special steel; they cut very efficiently and leave a clean and even surface in the silo. This prevents air getting into silage and warming up. Thanks to the open design of the cutting blade visibility during silage distribution is very good. Lower tines are made of hardened steel.

- ✔ **Strong and robust design, cuts efficiently also tightly packed silage.**
- ✔ **1000 mm cutter takes silage for 8 cows, 1300 mm cutter for 12 cows at a time.**
- ✔ **Open design – good visibility also when distributing the silage**
- ✔ **Strong lightweight construction**
- ✔ **Tines made of hardened steel**
