

Silage dozer blade

Electric Machine Compatible

Intended for moving uneaten silage back to the cattle on the feeding table. Mounts on the normal or XL silage grab simply by closing the upper grapple on the dozer blade. The blade can be grabbed with the silage grab from two sides which means that it can move the silage both to the right or to the left. Equipped with a durable nylon blade.

ATTENTION! Available only together with Avant silage forks.

- ✓ **Easy and economical way to push uneaten silage back to the cattle on the feeding table**
- ✓ **Mounts on normal and XL silage grabs**
- ✓ **Can be grabbed from two sides – moves silage to the right or to the left**
