Sleeves on pallet forks

Electric Machine Compatible

There are two types of sleeves available for 1100 mm and 1200 mm long pallet forks. They are pushed on the fork and locked with a bolt.

Nursery sleeves are intended especially for handling larger plants with root balls. The plants stay better on the sleeves than on the forks only, and the risk of damaging the root ball is smaller. The sleeves can be mounted both on the standard 1100 mm and 1200 mm pallet forks and the hydraulic forks, but it is much easier and faster to handle different size plants with the hydraulically adjustable forks.

Bale sleeves allow lifting and handling different (round) bales. They work best on the A442071 HD hydraulic pallet forks.

✓ **Compatibility: pallet forks A21039, A36589, A36279, A449516, A442071**
